Subject: Settlement is called for

Gentlemen:

It is important to the economy to get this thing settled. I feel that Microsoft has been harrassed enough and only because some people are jealous of its huge success. I do not see how marketing one's product can be unfair in the first place. I am sure no one had a gun held to their head! But prolonging this very unfair affair hurts everyone from the consumer to the employees, not only of Microsoft, but other companies as well. I feel personally, that this case should never have happened in the first place.
